**Tuning Guide**

1. Put the tuner on the headstock. (See pictures below.)

2. Look at the picture of the instrument you are holding to figure out the name of the string you are tuning.

3. The string is in tune when the green section lights up.

4. If the red section lights up, the string is “flat.”
   Turn the peg clockwise (away from you).

5. If the yellow section lights up, the string is “sharp.”
   Turn the peg counterclockwise (towards you).
