

# Tuning Guide

**1**

Put the tuner on the headstock. (See pictures below.)

**2**

Look at the picture of the instrument you are holding to figure out the name of the string you are tuning.

**3**

The string is in tune when the green section lights up.

**4**

If the red section lights up, the string is “flat.”  
Turn the peg clockwise (away from you).

**5**

If the yellow section lights up, the string is “sharp.”  
Turn the peg counterclockwise (towards you).
